

Dmitriy Orlovskiy

junior android developer - Remote

About me

For the last 5 years I have been involved in investments and entrepreneurship in various fields of activity. Investments stayed in my life, but the entrepreneur's activities had to be stopped after a number of unsuccessful projects.

My main feature is perseverance. I chose programming for myself as a tool for achieving my goals and getting pleasure from the development process itself.

I am looking for a close-knit team of specialists whose values coincide with mine: mutual assistance, mutual respect and support at all stages of interaction.

Relocate

I would like to work remotely, in connection with the hostilities in the country. When the situation stabilizes, I do not rule out working in the office and moving to any city.

Languages:

Ukraine / Russian - Native speaker
English - Pre-Intermediate

Experience

Freelance

2021 – currently

Implemented projects of medium complexity, adhering to the principles of Solid and MVVM/MVP architecture. Working with open API services, receiving and processing data in the application. Working with databases, user authorization, access to data on the phone (files, photos, bluetooth, etc.). Development with recyclerView / WebView.
